

Drury's Breeding Stock

Bourke Cochran

Registry No. 2158, Vol. 5

Description and Pedigree

BOURKE COCHRAN is a blood bay stallion, foaled April 1912; right hind foot white; sire Chester Dare No. 10, Grand Sire Black Squirrel No. 58; dam Mabel Denmark No. 2019 by Denmark Chief No. 682, 2nd dam by Coleman's Eureka F. S.; 3rd dam by Brinker's Dunow No. 1600.

Bourke Cochran is 16 hands high, weight 1150 pounds; beautiful head and neck, the best back you ever saw on a horse; good bone; without a blemish; fine mane and tail and carries tail right; never needs a pinch of ginger. This horse is absolutely in a class to himself; standard and registered. He goes all the gaits fast and well. His gaits are natural and not acquired. Bourke Cochran has made a reputation that would be a credit to any living stallion. Has

never been defeated when being shown in the model string and has won the blue in the combined saddle and harness horse sweep stakes at the Hodgenville Fair, LaRue county.

Arlington Dare

Registry No. 3433

ARLINGTON DARE is a bay stallion, star, hind ankles white. Sire Highland Dare No. 1534, he by Chester Dare No. 10, dam Mary Skelton No. 5153, she by Arlington Denmark No. 26 and he by Mambrino Denmark. This young stallion was foaled in 1908 and is a youngster of promise. He is bred right, is a strong individual and a bold going fellow, with plenty of size and finish.

What Some Good Horse Men Have to Say:

E. P. Hardaway—"I like his bold, get-away trot".
Tom Bland—"He is the best one that I've seen in these parts".
Taylor Dowell—"He is just the kind that I would have bought myself if I had been going to buy He's a show horse, too."
Walter Moorman—"Has plenty of bone and substance".
George Prather—"Looks better every time you see him".

These two stallions will be found at my place, 1 mile East of Bewleyville, on the Louisville and Hardinsburg road and will be permitted to serve mares at--Bourke Cochran \$20.00 for colts that stand up and suckle. Arlington Dare \$15.00 for colts that stand up and suckle.

2-Good Jacks-2 BEN

This famous Washington county Jack, known all over Breckenridge, Meade and Hardin counties for utility mules, with one of his sons, Independence, will be found at the above mentioned place where they will be ready for service at \$10 for a colt that stands up and sucks.

Ben is a Jack of some age, 15 hands high. The best breeding Jack in the three counties.

Independence

will be 3-years-old the 4th day of July, 15½ hands high, large bone and black as a crow. Would look good at the State Fair.

To the get of Bourke Cochran and Arlington Dare I will give premium of \$20 and \$15 respectfully for the best colt, the get of each. Will give a premium of \$10 for the best mule colt.

A few mares from a distance kept on grass at \$1.50 per month. Accidents at owner's risk.

Thanking you for past patronage and hoping to merit a continuance of same, I am

Very respectfully,

CHAS. H. DRURY
IRVINGTON, KY., Route No. 1

POULTRY

MAKING IMPROVED NEST-BOX

Weight of Hen Causes Platform to Tilt, Thereby Closing Door—Size Should Vary.

The size of the nest should vary according to the breed, writes Fred L. Bailey in the Farm and Fireside. For the Asiatic breeds it should be not less than 3½ feet long, 15 inches wide and 20 inches deep. The hen enters the nest by walking in on the platform. Her weight causes the platform to tilt, which, by means of the lever attached, closes the door. When the

Fig. 1
Improved Nest-Box.

hen leaves the nest, she goes for the light which comes in at the slot door. Her weight on the front end of the platform causes the door to open, and it stays open until she finds food and water and is ready to go back on the nest. The box is best with no floor, so the nest can be made directly on the ground.

Explanation: A, platform, 1½ feet long by which hen enters nest. B, board across back end of platform, on which she puts full weight when entering nest, causing platform to tilt. C, lever attached to platform and door, showing door open. D, point where lever is attached to door. E, point

where lever is attached to platform. F, board attached to under side of front end of platform, causing platform to stop on a level when door opens, and helping to balance platform. G, cleats with notches in upper ends for axles of platform to rest in. Notches are 8 inches from the bottom of the box. H, partition board between nest and platform. I, nest. J, cover.

THOUGHTS OF SPRING FEEDS

Birds Should Have Variety, Especially Great Deal Reasonably Rich in Protein—Lime Is Needed.

Apoplexy among fowls is generally confined to the overfat birds and generally the heavier breeds are subject to it. It is, therefore, necessary that the keeper does not feed any great quantity of fat-forming feeds to his birds, especially to the heavier breeds. In the spring of the year more than any other time of the year the birds should have a variety of feeds, and especially a great deal of feed reasonably rich in protein should be included in the ration.

Soft-shelled eggs are usually produced in considerable numbers at this time of the year. The reason for this generally lies in the fact that the birds do not get the proper feed. To form an egg shell the proper materials must be present, and if they are not present the soft-shelled egg is the result.

Lime is one of the necessary materials needed in the formation of an egg shell, and at this time of the year, when the hens are beginning to lay, a liberal amount of lime should be present at all times where they can partake of it when they desire. In providing any kind of feed whether it be vegetable or animal feed, be sure that it is pure and wholesome. Musty grains and rotten meats will cause sickness many times when the flock is in perfect health.

Guinea as Watchers.

A good point about guinea is that they make a good "watch dog." Every person who writes of these fowls mentions this point, but a good thing will bear repeating, in common with wild birds, they are always on the lookout for enemies, and quickly detect hawks, dogs, strange persons, etc., that venture near. Their wild cries on such occasions soon put the intruders to rout, and also put all the fowls on the place on their guard. If hawks are numerous a few guinea in the flock will prove of great help in preventing their depredations.

Laying in Winter.

Almost every hen running at large lays in the spring and lays well. If the poultryman can provide these conditions through winter, his hens will lay then the same as they do naturally in the spring.

Geese Pay Well.

No kind of poultry keeping can be carried on at so small an expense for buildings and equipment as that of raising geese, because of the hardiness of the birds, and their desire to remain in the open air.

The Old Reliable Beef Blood and Bone FERTILIZER

Manufactured by

Virginia-Carolina Chemical Co.

Gives better results than any other brand. Place your orders early.

GLEN DEAN, KY.

Mr. Blank's Mistake

"I made a bad mistake today" said Blank to his wife. "I went to pay that subscription to the daily, which was \$5. I found out afterwards that I had handed the agent a \$10 bill and didn't notice it until he was gone—guess he didn't either. I suppose that fellow is honest and I'll get my money back, but it'll be some trouble."

"I've been telling you" said his wife "that you should deposit your money in the bank and then pay by check. Then you won't be making such mistakes and having so much trouble."

Was she right? She was. We invite one and all to open a checking account at our bank.
